

/serverless/ **DAYS** **Belfast**

ServerlessDays Belfast, the software community conference focused on the industry's movement towards serverless and modern cloud technology, will return on **Thursday 15 May 2025**. From the 100-year-old Drawing Offices at **Titanic Hotel Belfast**, we will celebrate this year's theme:

Serverless is Serving - building with confidence and excellence

Serverless technology empowers engineers, businesses, and communities by removing operational burdens and enabling faster, more efficient solutions. Serverless isn't just about infrastructure—it's about **service**. By offloading server management, developers can focus on **delivering value**, accelerating innovation, and building scalable, resilient applications that **serve users better**.

Our speakers will showcase **how they have exceeded using Serverless Technologies**. The environment we now use is far beyond what we could have imagined 10 years ago when we first explored Serverless; let's celebrate some fantastic **builds and techniques**.

We're bringing together **international and local experts** to share insights, best practices, and real-world stories of how serverless reshapes industries. Whether you're an experienced cloud engineer or new to serverless, this event is a **dedicated space to network, learn, and get inspired**.

Full-price tickets cost £60 per person. However, **early bird tickets** and **discounts for group bookings** are available. Tickets include **breakfast, lunch and afternoon food and drinks**, and a guided **tour of Titanic Hotel Belfast**.

As a **not-for-profit community event**, we rely on the generous support of our sponsors. **ServerlessDays Belfast is proudly organised by volunteers** from AWS, G-P, Kainos, Liberty IT, Workrise, Rapid7, EverQuote and The Serverless Edge.
